Rheumatic Folks.

Are You Sure Your Kidneys are Well?

Many rheumatic attacks are due to uric acid in the blood. But the duty of the kidneys is to remove all uric acid from the blood. Its presence there shows the kidneys are inactive. Don't dally with "uric acid solvents." You might go on till doomsday with them, but until you cure the kidneys uric acid will never get well. Doan's Kidney Pills not only remove uric acid, but cure the kidneys and then all danger from uric acid is ended. Here is a Norway testimony to prove it.

Mrs. Solon Moore, living on Tucker St., Norway, Me., says: "About five years ago I was troubled with kidney complaint and attacks of rheumatism. My whole body seemed to be affected and during the spells the secretions from my kidneys were very sluggish in action and otherwise disordered. I used many remedies of different kinds but receiving no benefit. I at last procured Doan's Kidney Pills from Stone's Drug Store, and they proved to be excellent. My husband has also used Doan's Kidney Pills with good results, and we are both pleased to give this preparation our highest endorsement."

For sale by all dealers. Price 50 cts. Foster-Milburn Co., Buffalo, New York sole agents for the United States.

Remember the name—Doan's—and no other. 56

THE LAST ACT.

Now Tousehead is fixed for bed

And following her habit Darris in and out with romp and shout With no more than a rabbit On her wee form to keep her warm. But argument is stupid. And such as she need not to be Clothed any more than Cupid.

At least at night for pillow fight And rush and roll and tumble Such things as clothes and shoes and hose

Just help one to a tumble, And though she felt no grief at all Comes to her where she's wriggling. She gives a roll—God bless her soul!— And up she scrambles giggling.

And very soon to lulling croon, In his pink nightie smothered, She'll softly creep, almost asleep, To a lap to be mothered.

And, snuggled down for Slumbertown And for the nightie smothered, Pokes out her feet and coaxes sweet To have her "piggies" counted.

"This little pig" that means the big One—"went to market buying. Tave a pigging sound or imperfect hearing, and when it is entirely closed, Deafness is the result. When this tube is inflamed, taken out and this tube restored to its normal condition, hearing will be destroyed forever; also cases of small catarrhs of Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

F. J. CURENEY & CO., Toledo, O. Take Hall's Family Pills for constipation. 69

Care of Grafts.

Grafts which were set last spring should receive immediate attention. There are likely to be suckers starting from the old branches below the scions, and these should be removed, or they will rob the new growth. The scions

also are likely to make a branchy or irregular growth, and this can be prevented to a very large extent by suitable pruning or pinching, says Country Gentleman, in which the accompanying illustration shows a graft after two years' growing which now requires considerable pruning to bring it into proper condition.

A Leggy Geranium.

There is no need of throwing away a leggy geranium. Keep it growing at a good rate, and as soon as its older stems get long it will usually start new ones close down to the soil. Then watch for a time when the long stem is out of flower and cut it off close down to the flower, and the objection is gone. Even the longest legged of these plants have their uses. If in good vigor still they are fine for planting in the garden that are somewhat tall, where they will remain in full blossom all summer, never betraying their extreme age.—John Chamberlain in Country Gentleman.

Indigestion Ends.

You can eat anything your stomach craves without fear of a case of Indigestion or Dyspepsia, or that your food will ferment or sour on your stomach if you will occasionally take a little Diapiesin after eating.

Your meals will taste good, and anything you eat will be digested; nothing can ferment or turn into acid, or poison or stomach gas, which causes Belching, Dizziness, a feeling of fullness after eating, Nausea, Indigestion (like a lump of lead in stomach), Bloating, Heartburn, Water-brash, Pain in stomach and intestines or other symptoms.

Headaches from the stomach are absolutely unknown where this effective remedy is used. Diapiesin really does all the work of a healthy stomach. It digests your meals when your stomach can't. Each triangle will digest all the food you can eat and leave nothing to ferment or sour.

Get a large 50-cent case of Pape's Diapiesin from your druggist and start taking today and by tomorrow you will actually brag about your healthy, strong Stomach, for you then can eat anything and everything you want without the slightest discomfort or misery, and every article of food and beverage is going to be carried away without the use of laxatives or any other assistance. 69

A New Smokeless Fuel.

The smokeless fuel of a London inventor is produced by mixing two parts by weight of bituminous coal with one of peat and heating in a retort to 850 degrees F. The fuel yielded has high calorific value, ignites readily and is economical. The vapors driven off, containing the smoke forming hydrocarbons, are condensed and yield superior pitch and other valuable products.

ON A BUSINESS BASIS.

Very Practical Details In Profitable Dairying.

By JOHN MICHELLS, Clemson College.

Under average conditions a cow yielding twenty-two pounds of milk should, have a ration composed of about two-thirds roughage and one-third concentrates. By a number of trial calculations we find that the required nutrients are approximately obtained by selecting six pounds of wheat bran, four pounds of cottonseed meal, eight pounds of corn stover and forty pounds of corn silage. For greater yields it is best, as a rule, to increase only the concentrates to meet the requirements of the additional flow of milk, thus making the proportion of concentrate to roughage greater the larger the yield of milk.

The main part of the ration should be supplied in two feeds, one in the morning and the other in the late afternoon. It is desirable to feed some dry roughage at noon, especially when the roughage in the morning and evening consists of silage. The cow, on account of her large stomach, the paunch, is capable of storing up a large quantity of feed and therefore does not require as many feeds as some other farm animals.

Concentrates and Roughage. As a rule, it is best to feed the concentrates just previous to milking and the roughage immediately thereafter. The grain helps to attract the cows to their stalls, and by feeding the roughage after milking we avoid tainting the milk with undesirable odors when the roughage contains these. When corn silage, for example, is fed immediately before or during milking its odor is always perceptible in the milk. When fed after milking the odor is never detected. It is believed also that feeding the concentrates by themselves will result in a more thorough mixing of the saliva with them and thus increase their digestibility. Furthermore, a great deal of dust can be avoided by feeding the roughage after milking, particularly when the roughage consists of hay or dry fodder.

A prevailing opinion that heavy concentrates will form an injurious, pasty mass in the cow's stomach does not seem to be well founded. When the concentrates are fed directly before milking and the roughage directly after there will be sufficient mixing in the paunch before the contents pass into the stomach proper. The writer for several years has successfully followed the practice of feeding concentrates and roughage separately when the former consisted of as much as five pounds of cottonseed meal per day.

An average cow in full flow of milk will consume forty pounds of corn silage to good advantage. This amount of silage, combined with eight or ten pounds of dry fodder or hay, makes a good combination of roughage for a dairy cow.

Successful Feeding. In the economical production of milk it is absolutely essential to feed cows according to their capacity. Just what this productive capacity is can be determined only by keeping a careful account of the feed consumed and the milk and butter fat yielded by each cow individually.

About half the nutrients called for in a ration for an average milkster are used to sustain the body, so that it will neither gain nor lose weight, the other half being used to form milk. Returns for feed can therefore be expected only from about 50 per cent of the total nutrients required.

This means that a cow on a full ration will yield practically twice as much milk as she would on three-fourths of a ration. Yet there are thousands of dairymen who fail to supply the last quarter of a ration and thus bring ruin upon themselves and their business.

Battle of the Bullocks.

When the senior calves (grades) were sifted of their trash, some real beauties stood before the judge. Here was uncovered the champion of the grades and eventually the grand champion of the show. This was the handsome grade Shorthorn calf Roan King.

GRADE CALF ROAN KING.

[Champion of the grades and grand champion of the show at the late international.]

Shown by James Leask of Ontario. He is a son of Gloster's Choice, and his dam was by Royal Banner, a bull which came to this side. He is a grand calf, with remarkable arch of rib, a finely finished front, light lower limbs and little waste as a killer, and he is smoothly covered on back and ribs. The chief criticism lies in his tendency toward softness of flesh.

As a type of a Shorthorn show steer, with a weight of 1,090 pounds at about thirteen months old, Roan King fills a high ideal. He is quite mature, although in the calf class.—Breeder's Gazette.

Dairy Byproducts.

The effect of dairy byproducts on the carcass is one of the most important results of feeding them to hogs. It is generally admitted that, while excellent hams and bacon may be produced without dairy byproducts, the use of these byproducts will result in pork of a more nearly uniform high quality.

USES FOR SPUN GLASS.

Clothing Made of It Would Be Incom-
bustible and Acid Proof.

That spun glass, long known as a
curiosity and more recently employed
in making ornaments or in decoration,
will come into wide use for other and
more practical purposes is prophesied
by E. Lemaire in La Nature.

In recent years the electrical and
chemical industries have made large
use of the valuable properties of glass.
In the electrical industry its noncon-
ductibility for heat and electricity has
been especially useful, in chemical labo-
ratories its great power of resistance
to reagents. Nevertheless the applica-
tions of glass seem not to have been
developed to the utmost, and in particu-
lar we have scarcely utilized at all its
property of being easily spun and of
thus entering into the formation of
textile fabrics.

Clothing made of such textiles would
be incombustible, nonconducting and
resistant to acids and would be per-
fectly insulating to electricity. Work-
men wearing it would be proof against
burns in the metallurgical industries
and against injury by acids in chemi-
cal works, and finally in the electri-
cal industries rubber gloves when
guarded on the outside by spun glass
coverings would absolutely prevent
death from electric shock. The present
use of spun glass fabrics is not wide,
but the cause should be sought in the
lack of information on the subject in
technical literature.

Very Unkind.

"What is the matter with your eye,
man?"
"A cross section of timber I was
sawing flew up and hit me."
"Must have been a mighty cross sec-
tion and ill tempered as well."

Fine for Kidneys.

Here is a simple home-made mixture
as given by an eminent authority on
Kidney diseases, who makes the state-
ment that it will relieve almost any case
of Kidney trouble if taken before the
stage of Bright's disease. He states
that such symptoms as lame back, pain
in the side, frequent desire to urinate,
especially at night; painful and discol-
ored urination, are readily overcome.
Here is a recipe. Try it:
Fluid Extract Dandelion, one-half
ounce; Compound Kargos, one ounce;
Compound Syrup Sarsaparilla, three
ounces. Take a teaspoonful after each
meal and at bedtime.
These ingredients are all harmless and
easily mixed at home by shaking well in
a bottle. This mixture has a peculiar
healing and soothing effect upon the
entire Kidney and Urinary structure, and
often overcomes the worst forms of
Rheumatism in just a little while. This
mixture is said to remove all blood dis-
orders and cure Rheumatism by forcing
the Kidneys to filter and strain from the
blood and system all uric acid and foul,
decomposed waste matter which cause
these afflictions. Try it if you aren't
well. Save the prescription. 6-9

Fixed.
"But," said the good old lady, "why
don't you go to work?"
"Why, ma'am," began the disreputa-
ble old loafer, "yer see, I got a wife
and five children to support."
"But how can you support them if
you don't go to work?"
"As I was a-sayin', lady, I got a
wife an' five children to support me."

The Tramp: "No, boss. It wuz me coashman."

ARMOR CLAD ANIMALS.

Natural Protective Devices Common
In Lower Forms of Life.

Armor is not an invention of man,
but merely a rough and ready copy of
protective devices in use among the
animals from time immemorial. In na-
ture are examples of almost every kind
of armor, ranging from the tough in-
tegrument comparable to the shields of
dile borne by the savage warrior to
veritable suits of mail, reminding us
of those worn by knights of the fif-
teenth century. Some animals even
resemble the modern battleship fully
equipped or the locomotive fort de-
scribed by the imagination of H. G.
Wells.

Starfishes, especially of the tropical
seas, giants measuring from fifteen to
twenty inches across, show us a type
of armor not unlike the tough em-
bossed shields characteristic of early
warfare. Their integument is hard-
ened by the presence of much calcare-
ous matter and studded with bosses of
the same hard material. Among sea
urchins we find the strong box again
predominating.

Lobsters and crabs are excellent ex-
amples of armor bearing animals. The
lobsters have wonderful coats of mail
suggestive of those devised by human
warriors in the age of chivalry. They
combine perfect security with ease of
movement owing to their jointed struc-
ture. Crabs have planned their faith to
the strong box type of protection, such
as is fashionable among the tortoises.

The manner in which crabs when at
rest tuck their legs beneath them so as
to bring them under the shelter of the
hard carapace is interesting. The crab
is doubly protected, for it resembles a
water worn pebble and thus looks like
the indelible objects by which it is sur-
rounded. Large fishes like the cod are
in the habit of swallowing crabs, shell
and all. In this case their armor is of
no avail, but they are protected by
their resemblance to the stone.

The pangolins of South America are
almost lizard-like in outline, clad from
head to tail in a suit of horny plates
like huge thick finger nails overlap-
ping each other as do tiles on the roof
of a house. The head terminates in a
long, narrow snout. Within this is the
sticky, wormlike tongue used with rap-
idity and effect when an ant hill is
raided.—Chicago Tribune.

STERILIZED WATER.

Micro Organisms Destroyed by Intro-
duction of Ozone.

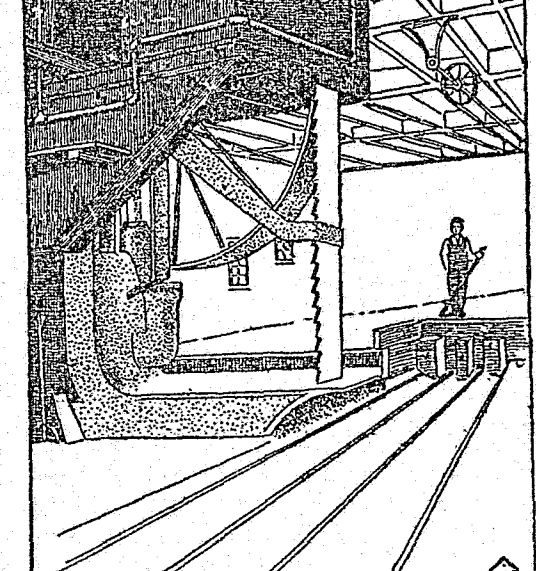

Ozone is one of the most powerful
oxidizers, and advantage has recently
been taken of this fact in France in
an entirely novel manner. Drinking
water, as already stated, though pass-
ed through a lengthy cycle of filtering
and purifying operations, is yet ex-
tensively infested with micro organ-
isms. The latest development is the
introduction of a certain amount of
the gas into the water at the top, so
that when drawn the liquid is to all
 intents and purposes perfectly sterile.
The apparatus now in use in France
is very simple in construction and in-
expensive to install. Mounted on a
small panel some fifteen inches square
is a small ozonizer, comprising sheets
of glass covered with tin foil on one
side and freely perforated. A current
of air is drawn through these plates,
which is ozonized under the influence
of the electric current. The ozonized
air then passes into an inverted glass
bulb into which the water is thrown
by the main pressure in the form of a
spray, and accordingly it combines
with the gas, which immediately seizes
on all bacteria present, destroying
them at once.
The water drawn from the top is
quite germ proof, while the addition
of the ozone imparts a delightful spar-
kle and an invigorating taste to the
liquid. The apparatus is very economi-

cal in operation, the ozonizer merely
being connected to the holder of an
electric lamp, while the simple task
of turning the tap sets the ozonizer in
action, switching off the current when
the supply is arrested. The electric
consumption is very small, one unit
sufficing for the sterilizing of a thou-
sand gallons of water.

The Largest Band Saw.

The largest band saw ever used is
twenty inches wide and sixty-five feet
long and has an eleven gauge with
teeth spaced three inches apart. It is
doing regular service in a lumber mill
at Houghton, Wash.

The great element of success in the
use of such a huge saw is the vigi-

LONGEST SAW EVER MADE.

lance of the filer in examining it after
every run for development of "fast"
places. Only by this means can the
saw be kept in perfect condition, for if
it is left until poor work is shown it
may get beyond control and the entire
saw be ruined.—Wood Worker.

Carbon in Human Body.

The human body contains about
enough carbon to make 3,000 lead pen-
cils or to make enough coal to burn
nearly two hours.

THE BLOOD PRESSURE.

Instrument For Measuring Devised by
Scientists.

An instrument long needed by the
medical profession for measuring blood
pressure has been invented by
Dr. D. R. Hooker of Johns Hopkins
university and hospital and by J. A.
Eyster of the University of Virginia.
There have been various theories ad-
vanced for the measurements of venous
pressure, but all were more or less de-
fective.

The new instrument consists of a
small glass box containing a rubber
bag. This is attached to the wrists of
the patient directly over the vein. The
box is connected by a tube to a water
manometer, to which is attached a
rubber bulb. By squeezing this bulb
pressure is exerted on the vein. When
the vein is seen to collapse the pres-
sure which is transmitted to the ma-
nometer may be read in centimeters of
water.

The Valuable Alligator.

The man of science has been study-
ing the alligator and has discovered
that every part is of some value. A half
grown specimen is worth far more in
money than the largest steer that was
ever separated into articles of com-
merce, even in a Chicago abattoir.
Take the teeth, for instance. They
are of such fine ivory that they can
be made into watch charms and other
jewelry, for they have a much brighter
luster and are as rich in tint as the
best tusks that ever came out of an
African elephant's head. The teeth
alone, says the Technical World Maga-
zine, are worth from \$2 to \$4 a pound,
according to size. Every square inch
of the hide makes a covering which is
far more durable and has a more at-
tractive finish than most leathers.

BLUE STORES

Last Days of Our Mark Down Sale

Here's a great chance to buy a Boys' Suit Cheap
\$2.38 for \$3.00, \$4.00 and \$5.00 Straight Knee Pant
Suits. Balance of our Winter Suits, Pants and Overcoats,
Fur Coats and Underwear at very low prices.

Spring Hats

Are in. Call and see them. Step in to our tailoring depart-
ment and let Mr. Seavey our tailor talk with you about making

The Despised Ailanthus.
Among the very common trees, yet
almost totally unknown, is the much
despised, ill smelling ailanthus. A
million dollars could not buy a board
of any lumber yard, says Arboricul-
ture. The dealer or manufacturer of
lumber never saw it on sale and would
not recognize it if seen. Yet it is a
most efficient wood, resembling white
oak and capable of receiving a high
polish.

Fire and Water Proof Cement.
Mix ten parts of finely sifted un-
oxidized iron filings and five parts of
perfectly dry, pulverized clay with
vinegar spirit by thorough kneading
until the whole is a uniform plastic
mass. If the cement thus made is
used at once it will harden rapidly and
withstand fire and water.—Werkstatt.

MERIT WILL TELL.

We will refund the money on one 25-cent box
of Lady Poo's Ointment if it fails to heal and
cure piles, salt rheum, eczema, open sores,
chafing, chapped hands and lips, blotches and
all eruptions and abrasions of the skin. We
only ask you to try one box to test its curative
powers. As all druggists and dealers, heavily

PROBATE NOTICES.

To all persons interested in either of the Es-
tates hereinafter named:
At a Probate Court, held at Paris,
in and for the County of Oxford, on
the third Tuesday of February, in the year
of our Lord one thousand nine hundred and
nine. The following matter having been
presented for the action, thereupon here-
after indicated, it is hereby ORDERED:
That notice thereof be given to all persons
interested, by causing a copy of this order to
be published three weeks successively
in the NORWAY ADVERTISER, a newspaper
published at Norway, in said county, that
they may appear at a Probate Court to be
held at said Paris on the third Tuesday of
March, A. D. 1899, at 2 o'clock in the
forenoon, and be heard thereon if they
see cause:

WILLIAM L. FICKETT, late of Greenwood,
deceased; will and petition for probate there-
of presented by Sarah A. Fickett, the execu-
trix therein named.

FRED N. FRYE, late of Fryeburg, deceased;
first account presented for allowance by
Warren M. Smart, Wallace R. Tarron and
Edward E. Hastings trustees.

ALFRED R. JENNINGS, late of Fryeburg, de-
ceased; petition for confirmation of Edward
E. Hastings as trustee under the will of
said deceased presented by Edward E.
Hastings.

HARRIET G. GORDON, late of Fryeburg,
deceased; petition for confirmation of a trust
in her will of said deceased presented
by Edward E. Hastings, the trustee named.

ALFRED P. GORDON, late of Fryeburg, de-
ceased; second account presented for allow-
ance by Horace G. Adams and Edward E.
Hastings administrators.

FRANK E. TOWER, late of Norway, de-
ceased; petition for an allowance out of per-
sonal estate presented by Dora B. Tower-
widow.

JAMES HEALD, late of Fryeburg, deceased;
petition for license to sell and convey real
estate presented by Edward E. Hastings, ad-
ministrator.

ADDITION E. HERRICK, Judge of said Court.
ALBERT D. PARK, Register.

A NEW RAILWAY SPIKE.

Inclined Shoulders Tend to Hold It Securely in Place.

The railroad spike illustrated in the accompanying engraving is of such design as to prevent it from working out of the cross tie when in use. It is provided with an inclined shoulder, which, when the spike is driven into the wood, forces it inward or toward the rail. A second shoulder or projec-

IMPROVED RAIL SPIKE.

tion on the inner side of the spike is thus made to bite into the wood and securely hold the spike in place. In Fig. 2 the head of the spike is indicated at B. The head is flat, and its lower face is inclined so that it will fit snugly over the lower flange of the rail.

The inclined shoulder, referred to above, is indicated at D, while on the opposite side is the projection C. The spike is designed to take advantage of the resilience of the wood of the tie. It is started with its inner face about an eighth of an inch from the edge of the rail flange E. When the shoulder C engages the rail flange the head of the spike springs back, permitting it to pass, and when the inclined shoulder D engages the tie plate F the upper end of the spike is forced against the flange and the projection C is made to bite into the tie. If in use the spike works upward the shoulder C will engage the underside of the rail flange or the plate F and thus be held in the tie. The result would be that, while not giving perfect service in holding down the rail, the spike would at least keep the track from spreading. Fig. 1 shows the spike entire.

A patent on this railway spike is controlled by Mr. M. Sylvia of Goldfield, Nev.

Childhood's Woes.
A little girl was sitting on the floor crying. After awhile she stopped and seemed buried in thought. Looking up suddenly, she said:
"Mamma, what was I crying about?"
"Because I wouldn't let you go out."
"Oh, yes!" And she set up another howl.—London Opinion.

Down the Old Road.
Silas—Took Mandy out driving last night and tried to kiss her.
Cyrus—And wouldn't she stand for it?
Silas—Yes, but the blamed old hoss wouldn't. He ran away.—Chicago News.

The Professor's Umbrella.

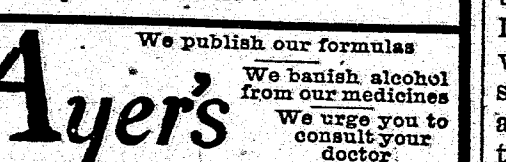

Professor—I certainly must get this umbrella refanned.—Munich Jugend.

Just Too Lovely.
Kligger—The best illustrated paper I've seen in a long while was handed to me today.

Ascum—What was it?
Kligger—A fifty dollar note.—Philadelphia Press.

Desperate Coughs

Dangerous coughs. Extremely perilous coughs. Coughs that rasp and tear the throat and lungs. Coughs that shake the whole body. You need a regular medicine, a doctor's medicine, for such a cough. Ask your doctor about Ayer's Cherry Pectoral.

Any good doctor will tell you that a medicine like Ayer's Cherry Pectoral cannot do its best work if the bowels are constipated. Ask your doctor if he knows anything better than Ayer's Pills for correcting this sluggishness of the liver.

Made by the J. C. Ayer Co., Lowell, Mass.

CHILDREN!

Vinol is the only preparation of Cod Liver Oil that children will take and which is easily assimilated by their delicate digestive organs. It builds up firm, healthy flesh, and makes little limbs round and plump. Delicate children thrive on it and love to take it.

The body-building and strengthening properties of Cod Liver Oil—but no oil—combined with peptonate of iron, makes Vinol the ideal tonic for delicate children. It tastes good and always does good.

GROWING CHILDREN
play hard and work hard. They use up an enormous amount of energy and vitality that needs replacing. Give them Vinol regularly. It keeps them healthy, builds strong bones, sound flesh and muscle and pure rich blood.

DELICATE GIRLS
"My 9 year old daughter was weak, pale, and had no appetite. I gave her Vinol, and she began to thrive at once. She gained rapidly in weight, color and strength."—MRS. W. H. GILMORE, Durand, Mich.

SICKLY CHILDREN
cannot digest ordinary Cod Liver Oil or Emulsion of Cod Liver Oil on account of their greasy nature and nasty taste. It upsets their delicate little stomachs. Vinol contains all the medicinal value they do and tastes good besides.

"MY TWO CHILDREN,
who were puny and ailing, rapidly gained flesh and strength when I began to give them Vinol. I proved that Vinol is a splendid tonic for delicate children."—MRS. C. ALLEN, New Bedford, Mass.

VINOL QUICKLY CURES A COLD AND STOPS A COUGH

YOUR MONEY BACK IF VINOL FAILS TO HELP YOU
FRANK P. STONE, Druggist, NORWAY, ME.
You can get Vinol at the Leading Drug Store in every Town and City in this State.

Farm, Field and Garden

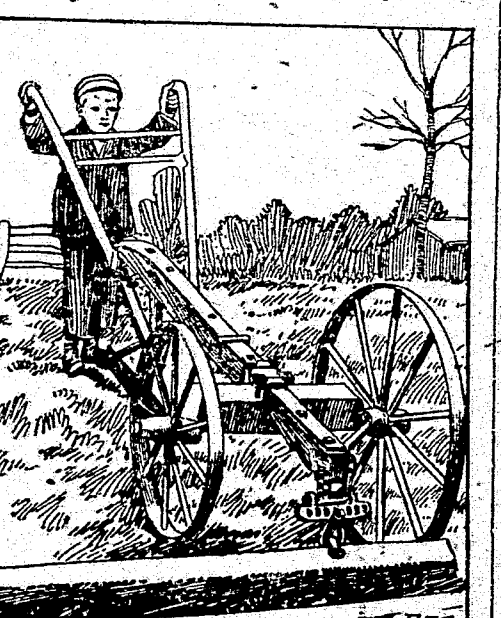

PLOWS AND PLOWING.

Wing's Adaptation From the French, in Use in Alfalfa Sod.

Four years ago, when I went to study French farming, their plows made me smile. They looked so crude, with their immense wheels and beams, so awkward in design, says Joseph E. Wing in the Breeder's Gazette, Chicago.

This year I spent more time in France and studied their plows more carefully and at work. I now consider the French plow, with its two wheels, its rigid beam and all, as being a wonderfully effective tool and think it does its work easily for the horses as well. I took hold of the handles of these plows and found that they ran with extraordinary steadiness.

Last fall we had sixty acres of alfalfa sod to plow, and alfalfa sod is notoriously hard stuff to manage. It takes a good plow, a good team and a good plowman to plow alfalfa sod at all. We learned that a walking plow is best for alfalfa sod. We really never had much success with a riding plow in such use, but we had learned that a wheel under the beam steadied the plow and was quite a help. The

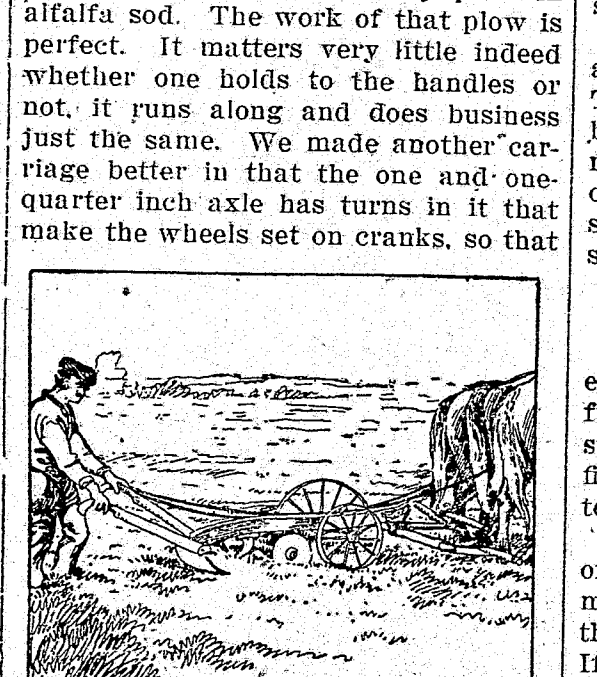

WING'S FRENCH FLOW IN USE.

It is readily adjustable to depth, and this works with a lever. The plow goes along as exactly as a big plane.

Now, it seems to me that plow manufacturers should take a hint from this. Such an attachment as I have adapted ought to be sold for less than \$10 and, added to the already very good plows, would make for perfect work.

ected it to the plow beam. Thus one wheel could go in the furrow, one on the land, and it ought to steady the plow finely.

I put the thing in the buggy and hastened to the field, eager to test it. We fastened it to the plow, and I eagerly watched for results. The horses started, a rod was turned, and Frank looked around with an astonished expression on his face. "Why, it's all right!" He went a few rods farther and called back, "Finest thing I've ever seen!" The long and short of it is that we are using that plow today. It has turned now about sixty acres, and much of the time it has been used by an old man who could never have endured holding an ordinary plow in alfalfa sod. The work of that plow is perfect. It matters very little indeed whether one holds to the handles or not, it runs along and does business just the same. We made another carriage better in that the one and one-quarter inch axle has turns in it that make the wheels set on cranks, so that

WING'S FRENCH FLOW IN USE.

It is readily adjustable to depth, and this works with a lever. The plow goes along as exactly as a big plane. Now, it seems to me that plow manufacturers should take a hint from this. Such an attachment as I have adapted ought to be sold for less than \$10 and, added to the already very good plows, would make for perfect work.

If the manufacturers will not do this, one can usually find old wheels either on his own farm or in the junk shop to make his own plow carriage. We find only one difficulty in adjustment. It is to keep the plow level, rather running a little on the land side, especially in tough alfalfa sod. This we manage by inserting a thin wedge of wood under the beam when clamping it down. There is a better way. One wheel might be arranged to be raised or lowered independently of the other.

How to Care For Clothes.
When an unwashable garment has just been taken off never put it into the wardrobe until it has been aired for an hour or so. Clothing which has been worn a long time, if not aired properly, contracts most disagreeable odors.

FRYEBURG CENTER.

An Accomplished Lady.
Dr. Pyrum Perry spent last week at O. P. Gray's and this week goes to Portland for a month's visit with her friend, Charlotte Thomas, and will celebrate while there her eighty-ninth birthday, March 12th. She gave a reading, Thursday evening, of Poe's Raven and a number of original pieces. She possesses great versatility of talent, being her own dressmaker and milliner, practicing her profession, writing for newspapers, etc., when most people at her age have given up all active employment.

The district school closed last week. Warren Swift has been at Toll Bridge for the past week.

Margery Pray is at E. C. Buzzell's, assisting Mrs. Buzzell with her work.

Charles Farrington was obliged to kill one of his span of colts on account of its having fits.

The Clay family, who have occupied a rent of E. C. Buzzell's for the past two years, have moved to New Hampshire.

Elmer Hutchins and Clarence Kimball run the roller here for breaking roads in place of E. D. Abbott.

EAST FRYEBURG.

Henry Warren is gaining.

Ray Douglass has been in Bridgton. It looked familiar to see our friend, Milton Lord on our streets Sunday.

Mrs. Matilda Harnden and daughter Marion visited at W. Lord's, Friday.

Mrs. Marcia March of Portland has been visiting her brother, Wm. Berry.

Mrs. Betsey Brown has been visiting her brother, Jacob Smith at Toll Bridge.

Mr. and Mrs. James Kenison of Concord has visited her sister, Mrs. Scott Douglass.

Willard Lord and Mrs. Sarah Blake of Denmark have visited their sister, Mrs. Mina Brown.

The last meeting of the Holt School League for the term was held Feb. 20 at Mrs. P. H. Howe's. After the business a short program was listened to. Refreshments were served by the hostesses. There will be a box supper and entertainment at the Holt schoolhouse, Saturday, Feb. 27.

WEBB'S MILLS.

Florentine Snell of Edward Little High school was in town, Monday.

Charles Winslow is home from Maine Wesleyan seminary for a few days.

Harnden Tripp is painting the scenery for the new play, Placer Gold.

The Lincoln School Improvement league have added sixteen new volumes to their library.

Mrs. Mary Smith, living this winter with Charles Emery on Johnson Hill, celebrated the one hundredth anniversary of her birth, Sunday.

Clarence Winslow had quite a lively runaway Sunday afternoon. The sleigh was overturned in turning around at the door and the horse ran till he threw himself in the crusty snow. No damage was done.

BETHEL.

Grover Hill.
Maurice E. Tyler is teaching.

Fred Mundt is at home from Norway for a few days.

A. B. Grover and crew are busily engaged sawing timber.

Mr. and Mrs. W. H. Hutchinson recently entertained guests.

Mr. and Mrs. Peter Wheeler were recent guests at Albert L. Whitman's.

How Professionals Starch Clothes.

The laundry method for starching collars and cuffs is considered by some housewives to be much superior to the usual home method. After the shirts and collars and cuffs have been washed and dried they are ready for starching. Use five tablespoonsful of starch and one-half cup of cold water, one-half teaspoonful of borax and a quart of boiling water. Cook the starch for half an hour. This is to be used merely on the bosoms, collars and cuffs of shirts and on the plated fronts of shirt waists.

Stretch cloth tightly on the table and tack it to the wall. The starch will be like jelly and should be rubbed in with the fingers. The rubbing is not complete until the various thicknesses are as one, and the starch then must be wiped from both sides with a damp cloth.

How to Remove Rust Spots.

Whenever the ordinary hooks and eyes have been used on light colored frocks there are almost sure to be spots of iron rust as a result. The very first thing to do is to rip off the fasteners and get the rustiest kind.

"Their rub each spot of rust with salt of lemon and wash out thoroughly. It may be necessary to repeat this two or three times, but it is worth the trouble. If you haven't this preparation use plain lemon juice. Soak the salt in it put it on the spot and expose to the sun.

How to Remove Mildew.

Should the clothes be mildewed the stains may be removed by a mixture containing equal parts of soft soap and starch, half as much common salt and the juice of half a lemon. This may be spread over the spots, and the article should be laid on the grass all day and all night until the stain entirely disappears.

"MOTHERS, YOU SHOULD ALWAYS KEEP IT IN YOUR HOMES"

"How My Boy Was Cured of the Grip by Using Father John's Medicine"

(By Mrs. Hattie A. Smith)

Mrs. Hattie A. Smith in a recent letter says: "Father John's Medicine ought to be in every home. My poor little boy, seven years old, had the grip and was sick for ten days. I was much worried over him. He had a very high fever and pain all over him. I had a bottle of Father John's Medicine at one time when I was sick with a cold in my chest and back, and it did me so much good that now I got a small bottle for Joseph.

NORTH FRYEBURG.

Mrs. Caleb Brackett is on the sick list. Walter Pickham has spent a few weeks in Boston and vicinity.

Agnes Chandler spent Friday and Saturday with Mrs. W. H. Thurston.

Mr. and Mrs. A. E. Gray spent last week visiting relatives in Bridgton.

Mrs. Charles Wiswell spent the day, Monday, visiting friends at Fish street.

Mrs. Clara Hastings and Mrs. Harry Hutchins have both been on the sick list.

Arthur Charles of North Chatham is visiting relatives and friends in the place.

Eden Andrews and wife of North Chatham have been visiting relatives here.

The young ladies will entertain the Universalist Guild at Red Men's hall, March 3d.

Irving Bennett was in the place Saturday and Sunday with his mother, Mrs. Lester Rose.

Mrs. Perley Binford's mother and sister of Conway have been spending a few weeks with her.

Mrs. Seth Webb of South Chatham and Mrs. Silas Walker spent Friday with Mrs. Wilson Webb.

Mrs. Dexter Charles of North Chatham spent Saturday and Sunday with relatives in the place.

Frank Walker and wife, who have resided in Portland for the past few months, are home for a short visit.

The dancing school at Red Men's hall is on the last half. It will be held on Saturday evenings until further notice.

Mrs. Anson Charles and wife, Will Shaw and family and Mrs. Lilla Walker spent Saturday at D. H. Charles', it being his birthday.

The people of Fryeburg Center played a drama at Red Men's hall Wednesday evening, Feb. 10th, entitled "Miss Topsy Turvy or The Deacon's Courtship," which was very much enjoyed. There was also a farce entitled "Seeing the Elephant."

Mrs. Porley Binford invited a few of her friends to her home on Thursday evening, it being the 15th anniversary of her marriage. After playing whist a few hours a treat of home made candies, pop corn, ice cream and cake was served. All returned home at a late hour having spent a very pleasant evening.

BRYANT'S POND.

The crows have come and spring will soon be here.

Dan Hayes was with his parents in Fowling Sunday.

Lena M. Felt from Rumford Falls was at her mother's over Sunday.

Archie D. Felt played with the orchestra at Berlin, Monday night.

Mr. and Mrs. G. L. Cushman and son, Robert, visited at Archie Felt's Tuesday.

A surgical operation has been performed on Mrs. Ernest Gammon's neck.

Mr. and Mrs. Frank Davis and son, Ellis, visited at G. L. Cushman's, Wednesday.

The Ladies' Aid expect to give a supper at the Grange dining hall Tuesday night, March 2.

Frank Stevens has finished working for Ed. Andrews and is working for Freeman Morse.

Myrtle A. Bacon of Portland is spending a week with her brother, Ralph M. Bacon.

John A. Titus and D. A. Cole have returned from Massachusetts, where they have been on a visit.

Spring is coming! The crows have commenced to dig their daily concerts in the good old town of Woodstock.

The traverse jurors summoned to attend at the March term of the supreme court returned to the clerk as follows:

Paris—John F. Plummer and Freeman H. Field.
Norway—George P. Downing and Eugene M. Sweet.
Bethel—Levi W. Bartlett and Nathaniel F. Brown.
Andover—Lewis H. Hall.
Albany—Roy Herriot.
Kennebec—Albert R. Hill.
Canton—William F. Shackley.
Denmark—Eldridge Thorne.
Fryeburg—Thomas W. Charles.
Dixfield—Ira O. Babt.
Gilead—R. I. Peabody.
Hartford—Oscar H. May.
Hebron—Fred H. Marshall.
Hiram—J. Everett Stuart.
Lovell—F. McAllister.
Oxford—Samuel O. Dudley.
Roxford—Walter K. Hamlin.
Woodstock—Alfred Day.

MARRIAGE INTENTIONS.

Filed With the Several Town Clerks.
Alvin Brown and Mrs. Eldora H. Wyman, both of Norway.

MARRIAGES.

In South Paris, Feb. 17, by Rev. J. H. Little, Manning E. Messer of Milton Plantation and Sadie Mae Davis of Woodstock.
In South Paris, Feb. 20, by Rev. J. H. Little, Charles William Tinswell of South Paris, and Alice May Tripp of Turner.
In Buckfield, Feb. 17, by Rev. A. W. Tottle, Fred L. Irish and Eva Mason, both of Buckfield.
In Lewiston, Feb. 13, Millard Mabery May, formerly of Buckfield, and Addie Mae Brown of Auburn.
In Norway, Feb. 20, by Rev. M. C. Ward, Harry Brown of East Stoneham and Gertrude V. McAllister of Norway.

BIRTHS.

In West Paris, Feb. 12, to the wife of Charles W. Crockett, a daughter.
In South Paris, Feb. 16, to the wife of Forrie W. Everett, a daughter.
In West Paris, Feb. 12, to the wife of Wilkie Haverinen, a son.

DEATHS.

In Buckfield, Feb. 21, Mrs. Ellen, wife of Larkin Farrar, aged 72 years.
In West Sumner, Feb. 12, Freeman B. Damon, aged 1 year, 2 months, 5 days.

BUCKFIELD.

Shirley Bonney has moved to D. S. Turner's.

The neighbors recently cut a good wood pile for Mrs. Hattie Churchill.

There will be a supper and baked bean supper at Irving Smith's this Friday night.

The officers elected at the telephone meeting were:

Pres.—Ellis Whitman.
Treas.—D. S. Turner.
Directors—C. W. Briggs, Ben Taylor, Shirley Bonney, Ellis Whitman.

It was voted to have the line run from Scott Briggs' to Hebron Station.

ALL RHEUMATICS INVITED TODAY

TO TEST URIC-O FREE

A 75-Cent Bottle Given Free To All Who Apply.

If there are still any sufferers from Rheumatism in this country or wherever this paper reaches, that have not yet tried the wonderful Rheumatic Remedy, Urlic-O, we want them to try it now at our expense. We firmly believe that there is not a case of Rheumatism in the world that will not yield to the wonderful effects of Urlic-O, and we want to prove it to every doubter beyond all possibility. The best way to do this is to give a large bottle of this remedy to every sufferer and let him test and try it to his satisfaction. If you suffer from Rheumatism, no matter what form, just cut this notice out of the paper and send it, together with your name and address, also the name of your Druggist, to the Smith Drug Co., 203 Smith Bldg., Syracuse, N. Y., and they will send you by return mail an order on your Druggist for a 75c bottle free.

We ask as a special request, that you purchase a 25c package of Uva-Lax Pills when receiving the free bottle, from your Druggist as the pills greatly assist Urlic-O. Use them together and be convinced of their great merit. We know from experience that the personal recommendation is the most valuable advertising, and that is the way we intend to acquaint the world with Urlic-O. Send for Urlic-O, no matter where you live. It is sold at Noyes' Drug Store at 75c and \$1.00 per bottle, and we want you to have a bottle free.

ONE DAY'S REO SHIPMENT TO WICHITA, KANSAS
 This Train Load of Reos was Shipped to the Wichita Automobile Company January 25, 1939, as a Result of the Brilliant Performance of the Reo on Road and Track and in Every Day Use During 1938, 1937 and 1936 in Wichita and Vicinity—Similar Other Large Reo Shipments Have Been Made, and Are Yet to be Made, in the Near Future in the South, North, East and West
 JOHN E. STEPHENS OF RUMFORD FALLS IS THE REO AGENT FOR OXFORD COUNTY

WEST STONEHAM.
 Beret McKeen came home from Norway, Thursday, and returned, Monday.
 Z. Fontaine is making extensive repairs in the upper story of his house.
 Lots of hard wood timber is being hauled into H. B. McKeen's new mill.
 Wm. Gammon made a short visit to his daughter's, Mrs. Bertha Kenniston, of Lovell.
 Mrs. Maude McAllister and little son Stillman, of North Waterford, have visited her parents, Mr. and Mrs. J. C. Sawyer.

NORTH NORWAY.
 Herbert York is selling fresh fish, Flora J. Cummings is at home now.
 Mrs. Belle Hussey is at home just now.
 Cora Morgan is at work for C. D. Morse.
 Fannie Hunt, from Hebron, is visiting Mrs. F. A. Hunt.
 Russell & Erick have finished sawing O. W. H. Judd's wood pile.
 H. E. Hussey is sawing wood for Geo. French, with his new gasoline engine.
 Fine weather for coasting, and Noble's Corner people, old and young, improved it the other day.
 Curtis' cream gatherer takes eggs of all who wish to dispose of them, and brings a check once a month.
 People up this way are glad Washington didn't have two birthdays. So many holidays and bad traveling, we go without the mail frequently.
 A village doctor returning from Greenwood, got his horse into the snow, near Swift's Corner, and had to be shovelled out. It was in the evening, and fortunate for him, help was nigh.

PARIS HILL.
 "Old Acre Folks."
 A goodly audience greeted the drama, "Old Acre Folks," at Academy hall last Wednesday evening. The play was finely cast and given with the spirit which sways the audience and keeps the interest at the highest point from first to last.
 One thing which helped much was the entire absence of prompting which so often spoils the best effects of a play.
 The local items which Deacon Evans (Mr. Holmes) read from the evening paper (?) caused much laughter and not a little good natured chaffing later.
 A rather odd thing was that just half the actors were old friends of a Paris Hill audience, but the other five may be sure of as hearty a welcome when they come again, which let us hope will be soon. In fact so good a play, so well cast, staged and acted is a treat not often enjoyed.
 Between the acts Frank L. Starbird of Norway gave several humorous selections which were well liked.
 Quite a number enjoyed the dance which followed the play, with music by Mrs. Hammond and Mr. Davee.
 Ice cream and cake were sold during the evening, and let us hope the Grange was so well pleased that they will give us another entertainment soon. They will have a good and hearty greeting.

OXFORD.
 Mrs. C. S. Hayes is in Augusta.
 Dr. E. B. Holden is ill with the grip.
 Mrs. William Robinson is ill with the grip.
 Lizzie Coulton spent part of last week in Boston.
 John Roys is very ill with heart trouble.
 H. S. Denning was home from Hebron over Sunday.
 Mrs. Clifton Bumpus went to Lewiston, Saturday.
 Mr. and Mrs. Coolidge of Upton were in town Monday.
 Dance in Robinson hall Saturday evening, February 27.
 Gussie Wardwell and Vera Kay went to Norway, Friday.
 Mr. Graham of Bates college preached at the Methodist church Sunday.
 Grace Warren of Welchville spent Sunday with her aunt, Mrs. W. R. French.
 W. E. Bumpus of the Moxey farm, Mechanic Falls, was in town Monday.
 Mrs. Geo. Sanders, Jr., of Portland is visiting her mother, Mrs. H. E. French.
 Mrs. Geo. Andrews of Portland is the guest of her sister, Mrs. Louise Richmond.
 The intermediate and primary schools closed last Friday; the high school closes Feb. 28.
 Everett Cook of Bates College spent Sunday with his parents, Mr. and Mrs. James Cook.
 Bernice Hanscom of Reading, Mass., has been the guest of her aunt, Mrs. W. S. French.
 The Harsey Guild met at the Congregational church Tuesday evening; they are studying art.
 Joseph Robinson of Andover, Mass., spent Sunday with his parents, Mr. and Mrs. J. B. Robinson.
 Mr. and Mrs. Leon Walker of Portland spent Sunday with their parents, Mr. and Mrs. Elmer V. Walker.
 The Brotherhood of St. Paul will serve an oyster supper in the Methodist vestry Friday evening, Feb. 26.
 Leonard Bowie, Walter Holden, Walter Wood and B. E. Flood attended the ice races at Lewiston, Friday.
 Mrs. J. B. Robinson and Oona Whyte have gone to Jacksonville, Florida, for the remainder of the winter.
 The sale and entertainment given by the Ladies' circle of the Congregational church was well attended. Mrs. A. N. Lewis of Bangor gave a very pleasing lecture in the afternoon.

This Bed Couch

COMPLETE WITH ELASTIC FELT MATTRESS PAD AND BOLSTER
 Sanitary Steel bed Couch—the couch guaranteed to easily hold 400 pounds. The spring construction is the famous "National Link" fastened to the frame at each end by coil springs, thus combining strength and comfort. The frame is finished in bronze and the bars, posts and rails are securely welded and riveted in such manner as to give the maximum of strength. Fitted with the best material castors. With the sides dropped and the pad, bolster and cover in place you have a handsome, spring-edge couch which is easily converted into a single or full size bed by raising one or both sides. The wings are automatically locked when raised.
 The Mattress and Bolster are of clean, sanitary, material. The mattress has square box edges, a soft yet compact and durable pad which conforms to the couch in any position.
 The couch is 74 inches long. When open it is 50 inches wide and when closed 30 inches.

EAST WATERFORD.
 Nellie Keene has visited at P. H. Howe's.
 Mrs. Alice McIntire and daughter, went to Norway, Saturday.
 Alton Howe, Mrs. P. H. Howe and daughter Julia, went to Norway and attended Grange.
 C. H. Merrill visited relatives and friends in Norway and Paris, and attended Lodge at Paris, Thursday evening.
 Alton Howe is having good success in the hen business this winter. He recently got an egg that measured 6 1/2 by 7 1/2 inches and weighed four ounces.
 A general invitation is extended to all to attend the box-supper and entertainment at the Holt district school-house, Saturday evening, Feb. 27. Ladies please bring boxes.
EAST STONEHAM.
 Mrs. Nancy McAllister remains about the same.
 Raymond McAllister bought a cow of Will Allen.
 The Ladies' circle will furnish dinner tomorrow meeting day.
 David McAllister swapped horses with Dell Walker of Norway.
 Bert Kendall and Frank McAllister caught two foxes last week.
 John C. Files is at home from the Portland hospital and is gaining slowly.
 Bessie and Alice McKeen of Norway visited their grandfather, Lorin McKeen, Sunday.
 John Grover of East Stoneham was at Charles Chaplin's Saturday. He is in the poultry business.
 Mrs. F. H. Bartlett went to Augusta Monday, February 15. Bertha Skinner of Waterford is caring for her children.
SUNDAY RIVER.
 Gladys Trask has been visiting Lillian Bean.
 C. D. Bean has been working for L. J. Trask, pressing hay.
 Marion Littlehale has been spending her vacation with her father, O. P. Littlehale.
 Agnes and Beulah Foster spent the day with their grandmother, Mrs. Priscilla Foster.
 L. J. Trask's team has come out of the woods where it has been working for J. J. Spinney.
 It is a very pretty sight to see the little pony team driven by Gladys and Edwin Trask. They are not at all selfish, they drive around among their school-mates giving them all a ride.

UPTON.
 Will Brown has moved home from the woods.
 Mrs. E. E. Lane has returned from Errol where she has been visiting.
 Harry Brooks and wife of Boston are visiting his parents at Mettalu Island.
 Mrs. A. V. Morse has gone to Gorham to visit her sister, Lucie, who is attending the Normal school. She also plans to visit in Portland a few days.
 One of the articles in the warrant for town meeting is to "See if the town will vote to set a cedar slab at the head of the unmarked graves in Upton cemetery."
 The private wire from Mettalu Island and the farmers' line have been crossed and the patrons of the farmers' line have enjoyed visiting the island by telephone.
 The fiercest snow storm of the season when during forty-eight hours it was estimated that from 18 to 24 inches fell. It is estimated that 28 inches fell at Errol, N. H.
 Mary A. Rogers.
 After a long season of ill health caused by diabetes climaxed by a severe sickness of only two days, Mrs. Mary Ann Rogers, wife of the late Daniel Rogers, died Feb. 4th, at her home in Naples, where she was universally beloved, and of which she was a life long resident.
 She was a daughter of the late Smith Chaplin of Naples, and was born Jan. 26th, 1840. Of this family there survive three sisters and one brother, Mrs. David Jilison of Otisfield, Samuel Chaplin of Naples, Mrs. Frank Trafton of Harrison and Mrs. James Trafton of Westbrook.
 Funeral services were held at her home Sunday, Feb. 7th, conducted by Rev. Nye, and were attended by many of her friends and neighbors.
 She leaves five children to mourn the loss of a kind and loving mother. Dana and Lorin Rogers of Naples and Mrs. Frank Pitts of Naples, Edwin Rogers of Lewiston, and Mrs. Leslie Hobson of Waterford.
 There was a profusion of beautiful flowers, consisting of a pillow with the word "Mother" at her head from her children, pinks, Mr. and Mrs. Edwin Rogers, calla lilies, Mr. and Mrs. Frank Trafton, pinks, Mr. and Mrs. James Trafton, a crescent from Mr. and Mrs. Howard Randall, and calla lilies from Mrs. Warren Chute. Interment at the Chute Yard in Naples.

LOOKES MILLS.
 C. E. Stowell was in Bethel, Thursday.
 Mr. and Mrs. H. F. Maxim were in Lewiston, Saturday.
 Mr. and Mrs. D. B. Grant are spending the week in Portland.
 I. I. Young of Waymouth, Mass., is visiting his sister, Mrs. James Crocker.
 Mrs. James Crocker and Mrs. David Foster were in Bethel one day last week.
 Lena Small went to West Paris, Friday night. She returned home Saturday night.
 Mrs. Axel Bryant is spending a few days with her mother, Mrs. D. F. Foster, at East Bethel.
 Mrs. O. W. Mason, Miss Alice Mason, Miss Luella Boothby of Bethel, spent Thursday with Mrs. F. A. Frost.
 A supper and entertainment for the benefit of the minister, Mr. Banghart, of Bethel, will be held in Mt. Abram hall, Thursday evening.
 Lorna Littlehale's little sister, from Bethel, is spending the week with her, at the home of Mrs. Ira Swan. Mrs. Littlehale spent the Sabbath in Norway.

EAST SUMNER.
 Levi Bryant has been visiting his daughter, at Rumford.
 Arthur Allen has finished the cord wood job on Hedgogh Hill.
 Elden Tucker has finished his cord wood job for E. L. Brown.
 S. W. Bean, with three men, are getting shovel handle blocks off the land of F. W. Bonney.
 F. S. Palmer and H. W. Bonney are engaged in reducing wood piles by means of gasoline power.
 R. G. Stevens has purchased the mill and feed business of F. L. Warren, Carl M. his son has returned from Portland, and will assist in carrying on the business.
 Rev. F. M. Lamb, the Baptist pastor, has returned from Boston, where he has been engaged for three weeks as a singer in the Chapman Alexander Revival meetings. He reports that the number of converts will exceed 5000.

BIBBETOWN.
 Little Mildred Nickerson was sick, Tuesday.
 Mr. and Mrs. Ishiah Hazeltine visited their son Fred, Tuesday.
 Ezra LeBrooke and Ernest Stone are cutting pine for Mrs. Lizzie Jewett.
 Lulu Wing and Susie Morse and two children called on Annie Hazelton, Monday afternoon.

WATERFORD.
 Elsie York has been caring for Susie Gaudin at South Waterford.
 John Kneeland has returned home after a few days' stay at Lewiston.
 W. J. Olmstead and family have visited his wife's sister, Sadie Pennock.
 Grace McKinney was at home over Sunday and returned to her school on Monday.
 Sadie Pennock and her little daughter, Belle, and her mother-in-law, Mrs. Pennock, were at C. B. Learned recently.
 Will Davis has laid away a horse.
 The school in Pummer Hill district closed Friday.
 Llewellyn Millett's boys are hauling wood to the flat.
 W. V. Kneeland is hauling timber to Bear Lake for Ed Emerson.
 Horace Allen visited his cousin, Charles Kingman, Sunday.

 John Grover and Leon York are cutting pine for George Stevens.
 Mr. and Mrs. Harry Dean returned to their home at Norway, Monday.
 William Stone and his grandson, Rob Heath, was in Harrison, Tuesday.
 Sadie Pennock spent the day with her mother, Augusta Learned, Tuesday.
 Mr. and Mrs. Herbert Whitcomb spent Sunday with Mr. and Mrs. Walter Shaw.
 Addie Olmstead and Mrs. L. L. Pennock was in Harrison on business Tuesday.
 Mr. and Mrs. Herbert Whitcomb visited Mr. and Mrs. Horace Allen Wednesday.
 Dr. John Douglas, daughter and grandchild, have returned to their home in Amesbury.

WEST SUMNER.
 Mrs. G. W. French has been on the sick list.
 W. W. French has been to Norway on a business trip.
 Lion Farrar is working for W. E. S. Skillings.
 C. M. Bucknam lost a work horse.
 Chancey A. Bucknam has been working for W. W. French.
 Fred Wing has been on the sick list.
 Mrs. Nell Rowe and Mr. D. A. Rowe of Redding, went to West Paris, recently.

Guy Heath is sick with the mumps.
 Mr. Atwood of Norwood, Mass., is visiting his son, Dr. F. H. Atwood.
 Geo. L. Curtis is driving a team to West Paris for Cummings & Ellingwood.
 Mr. Dale and wife of Milan, N. H., who have been stopping a number of weeks with her sister, Mrs. Alger B. Wheeler, returned Tuesday.
 The rain, Friday and Saturday with the deep snow, made the traveling bad, and there was but little passing. The water came up in the streets. We hope it will raise the streams so there will be water to run the saw mill, as there is an abundance of lumber to be sawed.

The fortnightly Aid was well attended Friday night notwithstanding the heavy rain, 46 couples responded. It was a masquerade and the most of the dancers were masqued. Oyster supper was furnished by Mrs. Ethel Chandler, President of the Aid, and Sister Mrs. Barrows.

NORWAY AND VICINITY.

Dr. and Mrs. Drake Entertain.
On Saturday evening, February 20th, a company of people met at the home of Dr. E. F. Drake on Pleasant street. The number included Principal and Mrs. P. E. Hathaway, Herman L. Howe, Myrtle Blackwood, Caro Beveridge, Rose Beveridge, Susie Wheeler, Harriet Abbott, Harriet Cragin, G. Rutledge Gardner, Lizzie Lasselle, Melvinia Green, Sarah Freeman, Goldie Frost, May Chaffin, Janet Russell, Alice Gammon, Westrop S. Stanley, Mr. and Mrs. Charles P. Barnes, and Caroline Hayden of Haverhill, Mass. The hospitality of Dr. and Mrs. Drake and Mrs. Hayden was appreciated by all the "school people."

The evening was spent informally and included a musical program of songs, contributed by Misses Wheeler and Rose Beveridge. During the refreshment hour, Mr. Barnes found at his place a mysterious package, which when opened proved to be a very beautiful ring set up in a green tourmaline—a Maine gem.
This ring was the gift of the entire corps of Norway teachers, given in remembrance of the faithful and efficient work of Superintendent Barnes. It is needless to say that the receiver was greatly surprised and very pleased with the gift. The teachers presented Mrs. Barnes with a bouquet of carnation pinks. It was greatly to be regretted that the condition of the roads was such as to prevent several of the teachers from being present. It was a very delightful occasion.

The Calico Ball.
The Calico Ball given by the Verander Club, took place Thursday evening, Feb. 18th. There was a large number present with about thirty couples. The grand march, led by Mr. and Mrs. John Gullinan, and many more joined in the dance after the march. Stearns' Orchestra furnished the music.

At intermission, ice cream and cake were served by the ladies of the club. This was the sixth annual ball and was looked forward to by many, as this is one of the occasions where, most particularly, young and old join in for a good time, and everyone did thoroughly enjoy the dance.

EAST SUMMER.

Union Grange, East Summer, is doing good work, and having large attendance at all of its meetings. At its last meeting, February 13, 100 responded to roll call, and members from Mt. Grange, North Buckfield, were present, by invitation also visitors from West Paris Grange. Enlarging the hall will be the next thing in order. The lecturer's hour was open to the public, and consisted of music, readings, and a dialogue in two acts. The secretary and assistant steward were absent on account of sickness, and at this writing brother Geo. E. Morrill has been critically ill. At the next meeting, Worthy State Master Stetson will be the guest of honor.

One Million Dollars for a Good Stomach.

This Offer Should be a Warning to Every Man and Woman.

The newspapers and medical journals recently have had much to say relative to a famous millionaire's offer of a million dollars for a new stomach.

This great multi-millionaire was too busy to worry about the condition of his stomach. He allowed his dyspepsia to run from bad to worse until in the end it became incurable.

His misfortune serves as a warning to others.

Everyone who suffers with dyspepsia for a few years will give everything he owns for a new stomach.

Dyspepsia is caused by an abnormal state of the gastric juices. There is one element missing. The absence of this destroys the function of the gastric fluids. They lose their power to digest food.

We are now able to supply the missing element—to restore to the gastric juices their digestive power, and to make the stomach strong and well.

We know that Rexall Dyspepsia Tablets will positively and permanently cure disordered stomachs, indigestion and dyspepsia.

We want you to try them and will return your money if you are not more than satisfied with the result.

Price, 25 cents. Only at our store, or by mail. F. P. Stone, Norway, Me.

Facts For Sick Women

We know of no other medicine which has been so successful in relieving the suffering of women, or secured so many genuine testimonials, as has Lydia E. Pinkham's Vegetable Compound.

In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound. Almost every woman you meet has either been benefited by it, or knows some one who has.

In the Pinkham Laboratory at Lynn, Mass., are files containing over one million one hundred thousand letters from women seeking health, in which many openly state over their own signatures that they have regained their health by taking Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound has saved many women from surgical operations.

Lydia E. Pinkham's Vegetable Compound is made exclusively from roots and herbs, and is perfectly harmless.

The reason why it is so successful is because it contains ingredients which act directly upon the female organism, restoring it to healthy and normal activity.

Thousands of unsolicited and genuine testimonials such as the following prove the efficiency of this simple remedy.

Minneapolis, Minn.:—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women, I felt sure it would help me, and I must say it did help me wonderfully. Within three months I was a perfectly well woman."

"I want this letter made public to show the benefits to be derived from Lydia E. Pinkham's Vegetable Compound."—Mrs. John C. Moldan, 2115 Second St. North, Minneapolis, Minn.

Women who are suffering from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

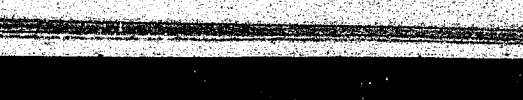

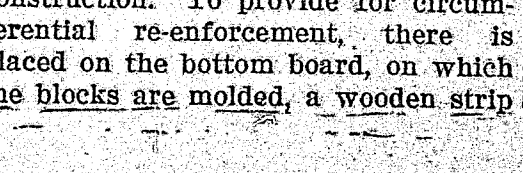

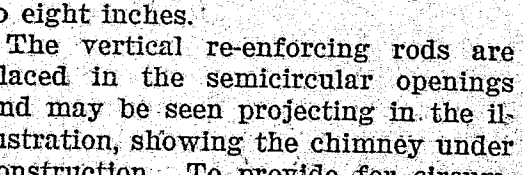

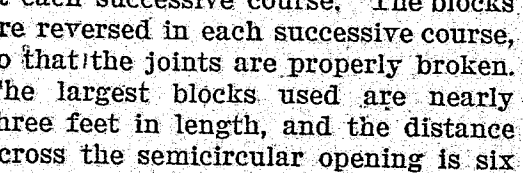

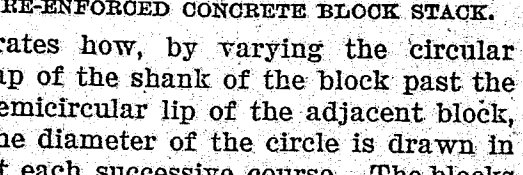

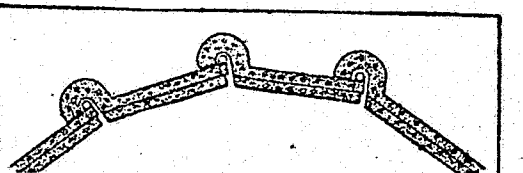

CHIMNEY OF CONCRETE.

Advantages Claimed For New System of Block Construction.

A Brussels inventor has devised a novel system of construction of concrete chimneys, in which, although the concrete is in blocks, re-enforcement is used, says Popular Mechanics. One of the most interesting features of the method is the fact that the chimney can be built without the use of scaffolding.

The concrete blocks are of large size, permitting rapid construction, and the provision for securing the taper in the chimney construction is particularly ingenious. The cast iron sides of the molds in which the blocks are made are in three pieces only, and the ends of the molds are formed by wooden stop blocks. By adjusting the position of these stop blocks the length of the concrete block can be altered to suit the course in which it is placed, thus securing the taper of the chimney without multiplying the number of molds. The chimney is polygonal in cross section and may be built with six, eight, ten, twelve or more sides, according to the size of the structure.

The diagram, which shows a partial cross section of the chimney, illus-

of triangular cross section. This leaves a V shaped groove in the block, in which a rod or wire may be placed. It is claimed that there is no difficulty in proportioning the re-enforcement to the stresses to be sustained, and it is obvious that the vertical rods are so placed as to be less exposed to the interior heat than is ordinarily the case.

Electric Sparks For Cancer.

"Fulguration" is the name proposed for the method of dealing with cancer that has been worked out by Dr. de Keating-Hart of Marseilles. Lack of results with X rays and other light radiations decided him to try high frequency electric currents of very high tension, and the spark rays generated prove active in destroying the tumor mass and stimulating the surrounding tissues to absorb the dead tissue and to form firm scars. Quite weak currents are used, with a tension as high as 250,000 to 300,000 volts. As much of the tumor is removed by cutting as practicable, and the sparks are applied where malignant tissue seems to be left, the application lasting about forty-five minutes. The process being painful, anaesthetics of noninflammable kind are necessary. Some medical experts who have investigated report that this method is a real advance, several apparent cures of cancer having resulted, while undoubted palliative and temporary effects have been achieved.

Origin of Ozone.

According to Messrs. Henriet and Bonysy, ozone is produced by the ultra violet rays of the sun in the upper atmosphere, and the amount contained in the air near the ground increases when air currents descend from the upper regions. Sometimes also it increases during rains. It has been observed that there is a reduction of the proportion of carbonic acid in the air when the amount of ozone increases. This is regarded as an indirect effect due to dilution of the lower air by the purer air descending from above.

An Indelible Ink Tree.

An Indelible Ink tree, known to botanists as Semicarpus anacardium, is chiefly found in India, but grows also in North Australia and the West Indies. Its nut supplies the natural marking fluid. When dried for commerce the nut is heart shaped and nearly black and contains a black viscous juice. For marking linen or cotton this juice is mixed with quicklime. It can be made into a marking ink by treating the nut with a mixture of alcohol and sulphuric ether and is also used for black varnish.

Welding Copper to Steel.

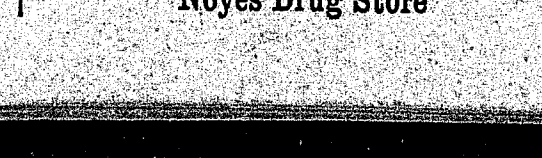

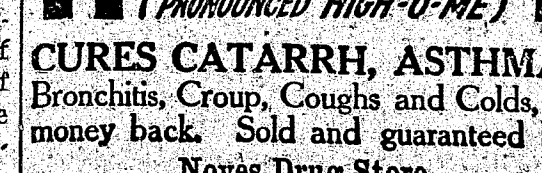

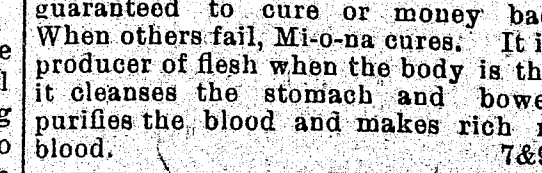

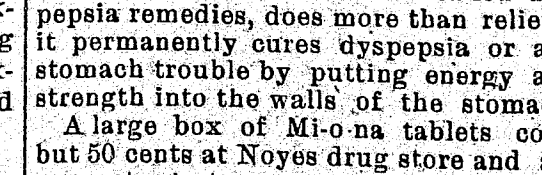

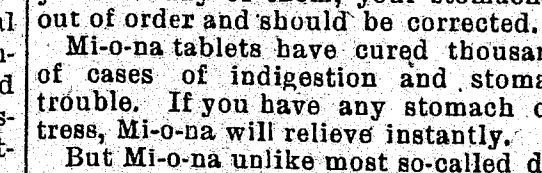

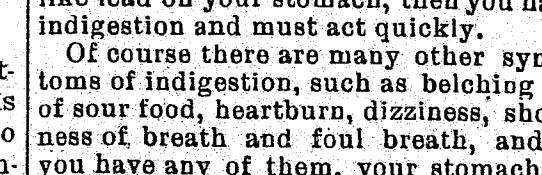

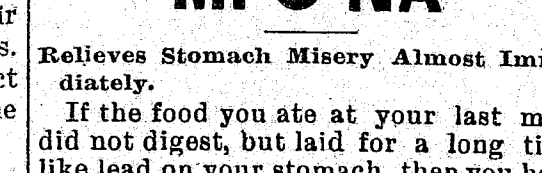

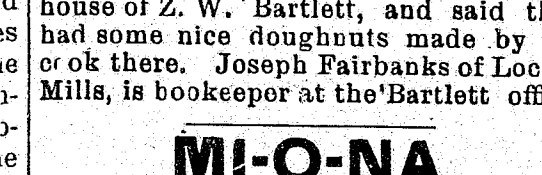

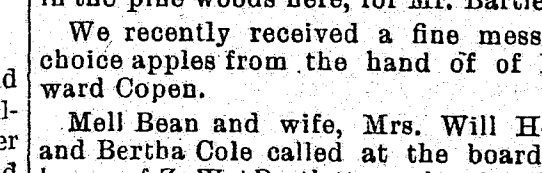

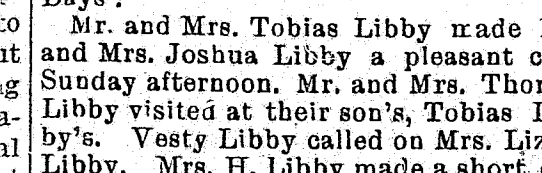

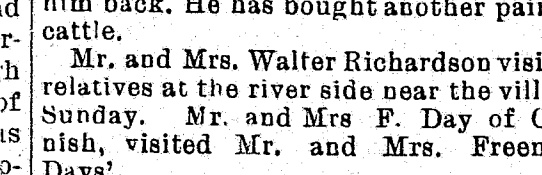

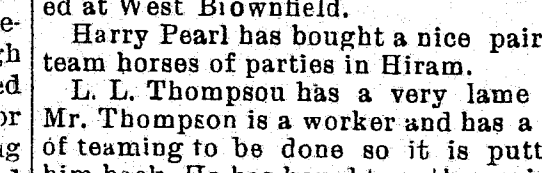

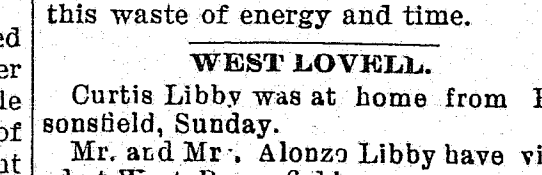

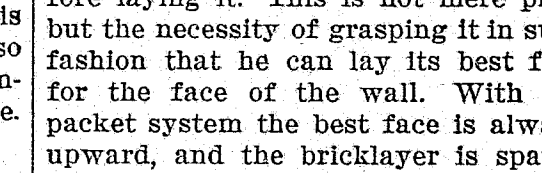

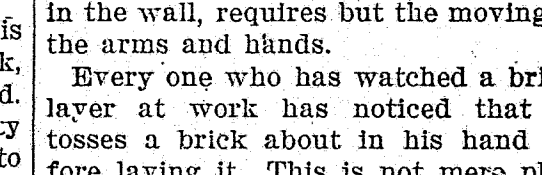

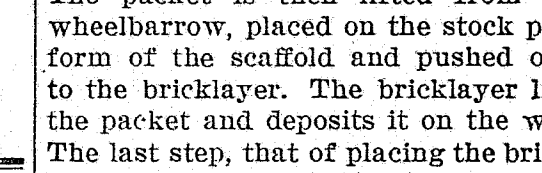

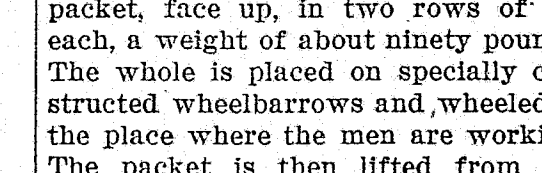

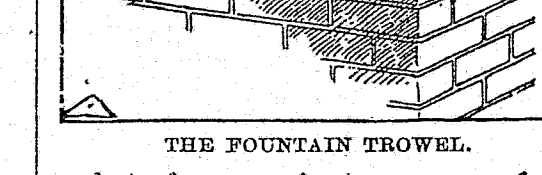

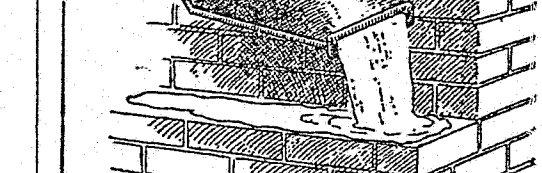

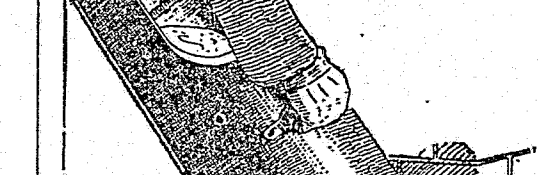

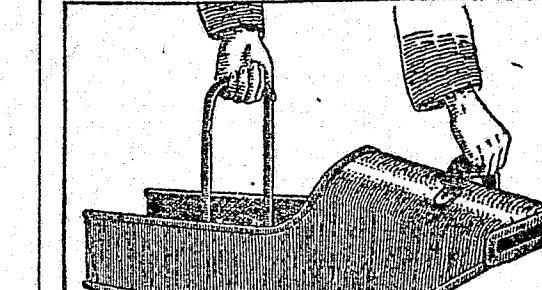

A Pittsburg company has begun the manufacture of a composite metal which is none other than the welding of copper or brass in any thickness to steel. The welding process has been under development by the company for many months, and it has been so successful that orders are already being received for good sized quantities of the new metal. The idea is to manufacture steel sheets of ordinary thickness and weld them to thin sheets of copper, thus giving the stability of steel to the sheet and at the same time practically the same welding or non-corrosive features of copper.

NEW BRICKLAYING TOOLS.

Fountain Trowel and Packet System. Tend to Expedite Work.

Two improvements recently made in the bricklaying art are noted with interest, says Brick. One is called the fountain trowel, and the other is a packet system of handling the bricks. The trowel is a metal can, shaped something like a Dutch wooden shoe. The heel is used to scoop up mortar from the mortar box, and the toe has a long opening the entire width of the can, through which mortar is poured upon the brick. This trowel or can makes it possible to spread a far greater quantity of mortar within a given time than the ordinary trowel and permits the bricklayer to use mortar sufficiently soft to fill the joints better, not only because it runs down into the unfilled joints of the course below, but also because it permits the shoving of the joints full of mortar in the course that is being laid.

The packet is a little wooden tray thirty inches long and the width of a brick. The bricks are placed on the

SPECIAL TEA SALE

These Teas we guarantee to be as good as represented or money refunded.

THE SALE WILL BEGIN

SATURDAY, FEBRUARY 20

LOT 1.

This Tea is a blend which we have sold for 40c. Will sell as long as it lasts for 20c per lb.

LOT 2

Is a blended Tea which we have sold for 45c, will sell as long as it lasts for 22c per lb.

LOT 3

Is one of "Bird and Frog" Formosa Teas and is a good one which we sell for 50c, will sell as long as it lasts for 30c per lb.

LOT 4

Is our 50c premium Tea which we will sell as long as it lasts for 35c per lb., with premium.

LOT 5

Is a blend of Formosa and Ceylon, is our best 50c Tea. Will sell it for the next ten days for 40c per lb.

LOT 6

Is a Ceylon and India, which we sell for 50c, will sell for the next ten days for 40c per lb.

LOT 7

Is the best Formosa Tea that we can buy, which we sell for 75c. Will sell for the next ten days for 60c per lb.

We will demonstrate any one of the above Teas that you care to see, between the hours of two or three o'clock during the sale. We also carry a large line of Coffees. From the best to the cheapest.

LEGISLATIVE NOTICE.

The Committee on Inland Fisheries and Game will give a Public Hearing at its room (Office of Fish and Game Commissioners) at the State House in Augusta, Wednesday, March 3d, 2 p. m.

On petition of C. L. Parker and others of Norway, Maine, asking for a law to prevent the hunting of deer with horns or bells or otherwise.

On Bill, An Act to regulate the taking of fish from Lower Kearsar pond in Fryeburg, Me.

On Bill, An Act to regulate the length of trout that may be taken in lakes and ponds at nine inches.

NOTICE.
Eugene Andrews formerly of Waterford has leased the wood shop of E. H. Haggett and will do all kinds of light and heavy carriage work. The paint shop formerly occupied by C. A. Young will be run by Andrews & Haggett. 8¢

ROAD DRAGGING COST

Why King System Is Cheapest
as Well as Best.

IT BECOMES MERELY A CHORE

By Quitting a Little Earlier a Farmer Can Easily Renew His Boulevard. Proof of Winter Dragging's Value. Comparison of Cost.

[Copyright, 1907, by D. Ward King.]
The cost of putting the King system in operation is a matter which must have consideration. Cost always is important.

When one first hears about road dragging he feels certain a mistake or an exaggeration is somewhere snugly concealed, and an active brain spends a certain period searching for its hiding place. Convinced at last of the drag's achievements as a wonder worker, the same brain asks, "What is the expense?" and again is skeptical when the answer comes. "The cost of the new system is many times less than the cost of the old system."

For the farmer who drags the half mile or more, as may be, from his own front gate to his neighbor's front gate toward town, there is no expense account. With the drag in the road at the front gate, he quits a little early at noon or in the evening, as the condition of the road soil decides, hitches to the drag and renews his boulevard. It becomes merely a chore. A neighbor of mine says, "After a fellow once gets into the fashion of dragging it sticks to him like a bad habit." For myself, I have been riding a drag since the spring of 1906.

In the fall I can take a team from a corn wagon at the crib and drag my half mile stretch before the corn is unloaded, and in the winter months most farmers can find an abundance of leisure in which to drag, and the operation possibly is of as much benefit in the winter as it is in the summer. In this latitude (near the Missouri-Iowa line) we find two conditions of the road in winter when dragging is remarkably effective. One of these special conditions is when a rough and frozen road is thawed an inch or more in depth at about 4 o'clock in the afternoon. Another favorable opportunity is at the close of a warm spell when the wind changes to the north and the mud begins to stiffen with the chill.

If the mud is dragged just before a freeze the road of course remains smooth until another thaw, and the difference between such a road and one which was permitted to "freeze up rough" is as marked as the difference between deep mud and a dry road. On the one you can skim along at any speed; on the other you must move at a snail's pace, with the horses gingerly picking their steps and the vehicle bounding around as if you were riding over a fresh blast in a rock quarry.

Let me offer two paragraphs from the Record, Hampton, Ia., the first showing the skepticism often met, the other confessing a radical change of opinion and furnishing proof of the value of dragging in the winter months. The writer addressed a group of roads meeting at Hampton Nov. 28, 1905. Under date Nov. 28 in the course of an extended report of the meeting the Record said:

"It is to be regretted that there was no split log drag at hand that he could make a satisfactory demonstration with, the one available not being in accordance with the requirements, and the attempt to show its workings were of little or no benefit."

"But in the issue for Dec. 9 the Record admits the inaccuracy of its first impression in the following paragraph, the kernel of which is found in the last sentence of the quotation: "The King drag that we have here in town is being used today on our streets, and if we had teams enough and drags enough Hampton would have good roads within the city limits tomorrow, whereas for a week they have been practically impassable for the reason that the ground froze up a week ago last night, leaving the roads all cut up. And suppose that every man in the county had had a King drag, costing about \$2, and had dragged the road in front of his premises once over and back a week ago Tuesday, the afternoon that Mr. King spoke at the courthouse, we would have had good roads ever since. This is demonstrated by the fact that wherever our streets the drag was used that afternoon has been a smooth track ever since."

So much for the value in the winter of the winter dragging.
But winter dragging prepares the way for lessening the cost of spring and summer dragging, because if the roadway has this winter preparation it will generally dry off and be ready to drag before the adjoining fields dry out and are at it to be plowed or cultivated. And so another series of leisure hours is provided for making good roads without money.

I would rather drag half a mile of road for a year than water three horses for a year.

If I should try to strike a balance for the twelve months, it would be something like this:

DEBIT.	
Labor	\$4.00
Comfort and pleasure of my own family	\$5.00
Time saved	10.00
Saving in wear and tear	5.00
Satisfaction	10.00
Benefit to neighbors and general public	150.00
Balance in favor of the drag	\$174.00

LIKE A ROMAN ROAD.

How a Chicago Millionaire Uses Roads on His New Hampshire Farm.

J. Gleason, the Chicago millionaire, who has made his summer home in Bethlehem, N. H., for the last twenty-four years, is rapidly attaining fame as a road builder, says a Bethlehem correspondent of the Chicago Record-Herald. He is now able to show three miles of probably the finest road in the White mountains, all within or adjoining his own estate and all public road, although it was all built or built over by Mr. Gleason at his own expense.

During the late autumn he had constructed a half mile of road on the main highway from Bethlehem to Littleton and during most of that time had a crew of seventy men, thirty horses and twenty oxen engaged on the work. Part of this road looks like pictures of the modern French or the old Roman roads, and it is built fully as solidly as the Roman roads used to be in fact, after the same plan.

The most important work done on the Littleton-Bethlehem road by Mr. Gleason this year has been an extensive filling of a stretch of road over some lowland where bad traveling had generally been the rule. At the lowest place the road was filled in six feet with stone, and the stone wall on each side was carried three feet higher, the wall in places being ten feet higher on the back side, or side toward the fields. The wall is three feet wide on top and is strongly built.

The road is twenty-five feet wide between the walls, and four teams by actual test can pass abreast. This wall extends for 400 feet and at one part describes a beautiful curve. Unless it is desired to make a full excavation of several feet is first made, and Mr. Gleason's men and oxen then begin to dump in immense stones taken out of the nearest fields. A fairly level course is made of these, and then another layer of somewhat smaller stones is dumped on.

Then comes a still smaller layer, and then, last, the stonework is leveled up and all openings are filled in with very small stones, so carefully and thoroughly placed that animals can be driven over without hurting their feet. Then the rock is entirely covered and the road finally shaped up with a good layer of "hardpan," which packs solid and is practically impervious to water.

Drainage at each side is always provided for, the roads are well rounded, and these features, combined with the solid foundation of rock underneath and the impervious layer on top, give an ideal road.

International Road Convention.
It is announced that the minister of public works of France has been authorized to call an international convention in his country in 1908 for the purpose of considering methods to prevent roads from being damaged by excessive automobile traffic. The use of the automobile, it is claimed, has produced many new problems in connection with the splendid roads for which France has become famous, and a plan for their construction and maintenance is deemed necessary. The delegates will therefore in particular discuss methods of adapting present roads to the new conditions of traffic.

Canada's Interest in Good Road Plan.
D. Ward King of Maitland, Me., who is the head of the rural improvement department of the American Civic association, has a drag log method for obtaining good roads at the least expense which is being adopted in the Canadian provinces. The Farmers Advocate of London, Ont., is offering \$100 in prizes for the best roads made with a King drag. In a personal letter the editor wrote: "A widespread interest has been aroused and many drags constructed in addition to those used by our contestants. So far we are more than delighted with what we have seen and heard of the results."

Different Now.
Trotter—Windig used to be a great fellow to blow his own horn. Does he still keep it up?
Homer—Oh, no. He has a chauffeur now.—Town Topics.

ARMORED FIRE DOORS.

Metal Covered Wood Displacing Iron and Steel.

Consul Church Howe sends from Manchester the following description of the armored door which is taking the place of the iron door in British warehouses and factories:
Within the last few years a great change has been taking place in the materials employed for the construction of fire resisting doors. Formerly it was supposed that these doors must be made of iron or steel, and, although doors made of these materials were often found useless owing to their liability to buckle and consequently to tear themselves, from their fastenings when exposed to extreme heat, it is only comparatively lately that a really effective substitute has been discovered.

Although the iron door is still made use of occasionally in all classes of buildings and, I understand, with comparative frequency in Manchester warehouses, one finds that in buildings designed for manufacturing purposes and especially in textile factories the armored door is rapidly taking its place and giving satisfaction.

The armored type of fire door is constructed of several thicknesses of well seasoned pine boards, planed, tongued and grooved and nailed together with wrought iron nails driven flush and clinched on the other side.
The wood is then completely covered with tinned steel sheets of not less than No. 20 standard wire gauge, each sheet being of a limited size, lock jointed and fitted close to the wood so that, while free to expand, they exclude the air and cannot become detached.

By this means combustion is prevented, and it is found that an exposure of several hours to the fiercest heat results only in the surface of the outer boards becoming slightly carbonized to the depth of a fraction of an inch.

SACK CARRIER AND LOADER.

Simple Device For Elevating and Loading Mill Refuse.

A cheap and easily constructed sack carrier and loader for carrying screenings and other stuff out of the basement of a mill to the ground floor and for loading sacks on the delivery wagon can be made from an old belt and a few pulleys.

The drive pulley A is on the shaft of a jack and is thrown in gear by pulling a rope hung in the most convenient place on the ground floor. This rope is attached to a lever in the basement that straddles the shaft on which pulley A is attached and bears against a collar on the shaft. A spring placed between the bearing and a collar on the end of the shaft is used for the release. When the rope is slackened the spring pulls the shaft out of gear. In this manner the sack loader is thrown in or out of gear instantly.

The driven pulley, or the return for the belt, is shown at B. If a wide belt is used and there is no wide pulley of small diameter at hand use two small pulleys together.

The lugs are made by attaching to the belt pieces eight or ten inches long cut from an old six inch belt and doubled, allowing them to roll up. They are fastened by means of elevator bolts, with the nuts on the top side. The roll will fall back over the nuts and prevent them from tearing or touching the sacks. A hardwood board, C, is placed in such a manner that the upper end is nearly flush with the face of the pulley B, and the lower end points to the center of pulley A. This will allow the weight of the bags to act as a tightener on the belt by sagging it down. This takes up any slack in the belt and prevents slipping.

A hopper, D, is built on the outside of the building. The lid of the hopper is thrown down and held by chains F. The lid of the hopper E forms the top when closed.—American Miller.

The Great Rose Family.
A recent flower show at Regent's park, London, included 2,000 varieties of roses, and it was stated that 450 new varieties have been added to the great rose family in three years. A nearly black rose was shown, with the assurance that the long sought blue rose would be brought out soon.

How to Make Boiled Apple Pudding.
Half a loaf of breadcrumbs, to which add a little salt. Pure, core and cut into thin slices two green apples, four quinces of chopped sweet, half a cupful of boiling water sufficient to moisten the mixture. Rub a little salt on the inside of the mold to make it smooth. Pack the mixture firmly as tightly as possible into the mold. Fasten the lid down securely and place in a boiler with only sufficient water in the bottom to make a steam. Let it boil this way for one hour, turn out and eat with the following sauce:

One cup of granulated sugar, quarter of a cup of water. Put together on the fire and allow to melt quickly, to which add the rind of half a lemon chopped fine, not grated. One minute after the strup begins to boil (kept any longer it turns to candy) remove it and add the juice of half a lemon. Serve hot.

How To Gain Flesh

Persons have been known to gain a pound a day by taking an ounce of Scott's Emulsion. It is strange, but it often happens.

Somehow the ounce produces the pound; it seems to start the digestive machinery going properly, so that the patient is able to digest and absorb his ordinary food which he could not do before, and that is the way the gain is made.

A certain amount of flesh is necessary for health; if you have not got it you can get it by taking

SCOTT'S EMULSION

Royal Baking Powder
Absolutely Pure

Renders the food more wholesome and superior in lightness and flavor.

The only baking powder made from Royal Grape Cream of Tartar.

NORTH CHATHAM.

Written by Granger.

Feb. 13, twenty members of Eagle Grange went to East Conway, where a cordial invitation had been extended to meet with the Mt. View Grange. As we arrived at the hall we were surrounded by a crowd of eager welcome. Upon entering the hall were thirty-five members of Fryburg Grange, who also had been invited.

The Sisters occupied the Chairs, being Sisters' day. The fourth degree was exemplified in a very creditable manner, the Sisters were dressed in white, and at the close of the degree all marched to the banquet hall where a fine dinner was waiting. Again we repaired to the hall when the address of welcome was given by the Worthy Lecturer of Mt. View Grange, Mary Woodard, response by Lucetta F. Chandler, of Eagle Grange.

Thus the afternoon passed pleasantly away with music, readings and discussion, a day long to be remembered.

We journeyed homeward with pleasant memories of our first visit with Mountain View Grange, and a strong desire to visit them again.

Mr. and Mrs. C. S. Chandler have been visiting in Bridgton.

M. O. Charles cut his foot quite badly, while cutting wood.

S. F. Wiggin and wife were at Richard Chandler's, Saturday and Sunday.

Mr. and Mrs. M. O. Charles have a baby girl, born Feb. 18. They now have four boys and four girls.

I see by the Advertiser, that Mrs. I. A. Andrews has recovered. Is it contagious? If so, what can be done to stop the spread of the disease?

E. Russell has finished work at West Bethel and returned home a few days rest, after which she will go to Portland, where she has a good position awaiting her.

School at the village closed Friday, February 19th, after a very successful term of ten weeks, taught by Edwina Farar. This is the fourth year, but we sincerely hope, not her last, term of school here. She is a fine teacher and, during her stay with us, has greatly endeared herself to all her pupils and their parents, as well as making many other friends. Friday afternoon several of the parents and friends visited school and were pleasantly entertained with recitations and dialogues by the scholars. A peanut hunt was much enjoyed by the children as was a nice treat of popcorn, butter and candy.

Prizes were presented to Mrs. Lennie Howard and Herbert Russell, who secured the highest score. Refreshments of punch, fancy crackers, olives, candy and apples were served. Those present were Mr. and Mrs. H. E. Lyster, Mr. and Mrs. E. O. Hayford, Mr. and Mrs. E. S. Mitchell, Mr. and Mrs. H. A. Staples, Mr. and Mrs. F. H. Silver, Mr. and Mrs. E. E. Howe, Mr. and Mrs. G. G. Howe, Mrs. Lennie Howe, Misses George Abbott, Etta Howe, M. H. Holt, Edwina Farar, Blanche Russell, Eva Russell and Messrs. G. L. Smith, A. G. Howe, B. J. Russell, H. L. Russell, and A. C. Wright.

LOVELL.

Lee Parker has gone to Westbrook.

Mrs. E. W. Stanley is quite sick with a gripe.

Mrs. Charles Norton is critically ill with pneumonia.

Mr. and Mrs. Elmer Andrews are helping at Mr. Norton's, while his wife is ill.

Sunkook Grange meets with Kezaz Lake Grange, Mar. 3, an all day session. G. A. Kimball, A. M. Pottle, A. W. Mason and W. S. Fox will be the speakers from Sunkook Grange. The question is, Which is the greater drawback to a farmer, lack of capital or lack of method.

Last Saturday afternoon Don and Roger Eastman were going to the village, when about opposite J. E. Thompson's shop their horse stumbled and fell prostrating all efforts to get her up were unavailing. Help was summoned and after about two hours of trying to give her relief she was hauled over to Horace Kimball's, where she died Sunday night.
